

Bridgeport Hospital - Yale-New Haven Health System, Park Avenue Campus Outpatient Center

Trumbull, CT | 2014

- Bridgeport Hospital's Park Avenue Campus Outpatient Center in Trumbull provides a new level of access to quality outpatient care in southwestern Connecticut, with a range of hospital and health system services that includes ambulatory surgery, cancer treatment, radiology, urgent and primary care, and breast care.

The new 100,000 s.f. three-story facility creates a hub for a unified patient care campus, joining two existing buildings that house radiation oncology and medical offices that will undergo a 20,000 s.f. renovation.

Sheltered by a generous canopy, the patient drop-off at the prominent main entrance conveys a sense of welcome, with easy access to all services from the lobby. An enclosed bridge connects to an adjacent 525-car garage. An enclosed bridge connects to an adjacent 525-car garage. The design brings nature into the space, with views of a healing garden from the center's glass-walled corridors.

The garden-level cancer center emphasizes patient privacy and healing, with a dedicated entrance and parking and views of the healing garden from its lobby and private infusion suites. The center's medical oncology program connects seamlessly to the radiation oncology program in the adjoining building.

Bridgeport Hospital is a member of the Yale New Haven Health System. Square Footage: 120,000 s.f.
